CARBON REDUCTION PLAN GUIDANCE

Notes for Completion

Where an In-Scope Organisation has determined that the measure applies to the procurement, suppliers wishing to bid for that contract are required at the selection stage to submit a Carbon Reduction Plan which details their organisational carbon footprint and confirms their commitment to achieving Net Zero by 2050.

Carbon Reduction Plans are to be completed by the bidding supplier¹ and must meet the reporting requirements set out in supporting guidance, and include the supplier's current carbon footprint and its commitment to reducing emissions to achieve Net Zero emissions by 2050.

The CRP should be specific to the bidding entity, or, provided certain criteria are met, may cover the bidding entity and its parent organisation. In order to ensure the CRP remains relevant, a Carbon Reduction Plan covering the bidding entity and its parent organisation is only permissible where the detailed requirements of the CRP are met in full, as set out in the Technical Standard² and Guidance³, and all of the following criteria are met:

- The bidding entity is wholly owned by the parent;
- The commitment to achieving net zero by 2050 for UK operations is set out in the CRP for the parent and is supported and adopted by the bidding entity, demonstrated by the inclusion in the CRP of a statement that this will apply to the bidding entity;
- The environmental measures set out are stated to be able to be applied by the bidding entity when performing the relevant contract; and
- The CRP is published on the bidding entity's website.

Bidding entities must take steps to ensure they have their own CRP as soon as reasonably practicable and should note that the ability to rely on a parent organisation's Carbon Reduction Plan may only be a temporary measure under this selection criterion.

The Carbon Reduction Plan should be updated regularly (at least annually) and published and clearly signposted on the supplier's UK website. It should be approved by a director (or equivalent senior leadership) within the supplier's organisation to demonstrate a clear commitment to emissions reduction at the highest level. Suppliers may wish to adopt the key objectives of the Carbon Reduction Plan within their strategic plans.

A template for the Carbon Reduction Plan is set out below. Please complete and publish your Carbon Reduction Plan in accordance with the reporting standard published alongside this PPN.

¹Bidding supplier or 'bidding entity' means the organisation with whom the contracting authority will enter into a contract if it is successful.

Carbon Reduction Plan Template

Supplier name: ...SVL Healthcare Services Ltd

Publication date:12/04/23.....

Commitment to achieving Net Zero

SVL Healthcare Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022	
Additional Details relating to the Baseline Emissions calculations. This organisation has reported emissions from 2022 in order to achieve its goal of net Zero of by 2050. Following our first year assessing our carbon footprint, we pledge to complete annual reviews of our CPR to further develop our emission reduction.	
Baseline year emissions: January – December 2022	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	876.16
Scope 2	830.2
Scope 3 (Included Sources)	193.36
Total Emissions	1899.72

Current Emissions Reporting

Reporting Year: January – December 2022	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	876.16
Scope 2	830.2
Scope 3 (Included Sources)	193.36
Total Emissions	1899.72

Emissions reduction targets

In order to continue our progress toward achieving Net Zero, we have adopted the following carbon reduction targets.

25% decrease in Scope 1 emissions by 2030. Achieved by introducing changes to our existing fleet and office systems.

30% Deduction in Scope 2 emissions by 2030.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been implemented since the 2022 baseline. The carbon emission reduction achieved by these schemes equates to 10.2 tCO₂e, a 0.54%ge reduction against the 2022 baseline and the measures will be in effect when performing the contract.

Due to 2022 being our baseline year, we have initiated the implementation of some measures such as the introduction of an electric vehicle within our fleet. As well as engaging with some VCS Schemes. In addition to this, we work alongside our sister company which works on renewable energies and retrofitting projects. We are able to offset our carbon against the carbon reduction projects which they complete.

In the future, we hope to implement further measures such as:

Continually increasing the percentage of our fleet allocated to electric vehicles by a minimum of 1% per annum.

Renewable energy projects including the installation of Solar PV and Air Source Heat Pumps (ASHP) have been identified to be in place by 2035. We shall ensure there is an ongoing

investigation into new technologies and opportunities to establish if further reductions can be made.

Additional investment with VCS¹ to ensure we can develop our offsetting portfolio.

An annual review of our supply chain will be completed in order to ensure continual reduction of our Scope 3 Emissions.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁴ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁵.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Brian Wren

CEO
